- Skilled manager of teams of attorneys and public policy professionals
- Experienced facilitator of committees responsible crafting, reviewing and amending legislation

This is my Journey

“Without help, an individual in a mental health crisis may continue to struggle. I connect them to important community resources.”

Jessica Gross
Clinical Specialist
Journey Mental Health Center

Why Journey? What is your connection to mental health and/or what do you want others to know about Journey?

Most people are touched by mental illness personally at some point in their lives. Struggles that persons with mental illness deal with are something we can all relate to. Treatment works, and access to mental health treatment is crucial for both the individual suffering from illness, as well as society at large. Journey is a

key community resource because of its focus on persons with serious mental illness, many who are under-resourced. I appreciate the opportunity to help guide Journey to a more solid footing, and to become more well known in the Madison area.
